

## For the auditable, digital materiality analysis

The cloud-based Materiality Insight Analyzer (MIA) application supports you to efficiently and purposefully carry out the double materiality analysis - the heart of your sustainability reporting.

### Your challenges

- ▶ Variety of relevant data in varying quality
- ▶ Unclear quality of the evaluation
- ▶ Lack of transparency and documentation
- ▶ Regular updating required
- ▶ Comparability and consistency
- ▶ High expenditure of resources
- ▶ Cross-functional collaboration
- ▶ Missing instructions

### Our solution

- ▶ Simple, self-directed and comprehensible process enables efficient and targeted implementation of the materiality analysis
- ▶ Clear user interface and structures simplify operation
- ▶ Auditability is achieved through comment and upload functions as well as traceability of data entry
- ▶ Automated materiality matrix
- ▶ Reference book included
- ▶ Roles and access rights
- ▶ Unlimited number of materiality analyses

#### Security

- ▶ GDPR-compliant
- ▶ Servers in Europe
- ▶ Multi-factor authentication
- ▶ ESRS-compliant and auditable

#### Service

- ▶ Continuous further development
- ▶ Regular updates
- ▶ Subject-specific and technical support
